

VISION TM-TELE Telescopic Proj. Bracket (TM-TELE)

VISION TM-TELE TECHMOUNT PROJECTOR CEILING MOUNT, WHITE, Fits most projectors, Telescopic pole 440-740mm, obstruction-free cable management. Included: retrofitting ceiling trim disc, sloping ceiling mechanism

The TM-TELE Techmount is a projector ceiling bracket for anchoring any data projector safely to a ceiling. The telescopic design allows fast deployment and adjustment without the need to cut and drill the pole. It has a greater range than most other telescopic mounts and the pole can be removed for "flush-mounting" the projector as close to the ceiling as possible.

Key Selling Points

- One-man installation
- Sloping ceilings
- Safety approved
- Easy fit
- Obstruction-free cable management

Product Features

One-man installation
Thoughtful design detail includes a length adjustment clamp system which requires only one hand.

Sloping ceilings
A tilting mechanism is included which tilts to a full 90 degrees, allowing you to use the bracket as a boom if needed.

Safety approved
A back-up fall-arrest tether is included which secures the projector to your bracket, and the pole has a mechanical stop so that the two parts of the pole cannot be separated.

Easy fit
Projectors have threaded inserts in the bottom for attachment - but not all use the same diameter screws so Vision includes a selection to suit most projectors. Simply locate the "spider" arms on the bracket over the attachment holes, and insert a screw into the projector.

Obstruction-free cable management
Vision's unique 'chute-through' system leaves cable access clear - even for big VGA connectors.

Secure
Quick-release mechanisms make life easier for thieves, so the TM-TELE is secure and features security bolts.

Main Specifications
