

Wild Things

The English past is rich with eccentrics and pioneers whose passion for adventure and discovery took them from the comfort of home to the far flung corners of the world. Following the footsteps of these early explorers, Wild Things traces a path of adventure across the globe, capturing in a collection of 'scented souvenirs' the spirit of the weird and wonderful.

A selection of evocative scents from Ashleigh & Burwood's coveted Lamp Fragrances have been chosen for the collection. Fragrances travelling from spicy and sophisticated to exotic and fruity conjure up destinations of country estates, mysterious islands, and tropical jungles. Paired with each scent is a vibrant graphic artwork by in-house designer Sumitta Spencer-Townson, creating patterns of flora and fauna tied to each theme. Accented with gold lids, Wild Things' luxury candles and reed diffusers create a bright, bold statement, celebrating the colourful eccentricity at the heart of the collection.
